

## 2. Full Stack Engineer Job Advertisement

**Job Title:** Full Stack Engineer

### **Job Description:**

We are looking for a **Full Stack Engineer** to join our growing development team. The ideal candidate should be passionate about both frontend and backend development, with expertise in building scalable web applications. As a Full Stack Engineer, you will play a key role in designing, developing, and deploying applications from the ground up.

### **Key Responsibilities:**

- Develop, test, and deploy scalable web applications using both frontend and backend technologies.
- Work with frontend frameworks (React, Angular, Vue.js) and backend technologies (Node.js, Python, Ruby, etc.).
- Design and implement RESTful APIs and integrate with third-party services.
- Work closely with UX/UI designers to create a seamless and responsive user experience.
- Ensure cross-platform optimization for mobile devices.
- Manage databases, optimize queries, and ensure data integrity.
- Collaborate with other engineers to design and maintain the architecture of applications.
- Participate in code reviews and contribute to team best practices.
- Troubleshoot, debug, and optimize application performance.

### **Required Qualifications:**

- 3+ years of experience as a Full Stack Developer or similar role.
- Strong experience with frontend frameworks (React, Angular, Vue.js).
- Experience with backend technologies (Node.js, Django, Flask, Ruby on Rails).
- Familiarity with relational databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB).
- Strong understanding of web protocols (HTTP, WebSockets, etc.).
- Proficiency with version control systems (Git, GitHub, GitLab).
- Experience with testing frameworks (Jest, Mocha, etc.).
- Excellent problem-solving and debugging skills.

### **Desired Skills:**

- Experience with cloud platforms (AWS, Azure, GCP).
- Knowledge of containerization and orchestration tools (Docker, Kubernetes).
- Familiarity with mobile app development or progressive web apps (PWA).
- Experience with DevOps practices and CI/CD pipelines.
- Strong communication skills and ability to work in a collaborative environment.
